

The Crag Dog Course

Welcome!

I'm so excited to get to bring you THE Crag Dog Course!

Training a great Crag Dog involves training skills for an extensive range of situations. But with some thoughtful planning and teaching, our dogs can learn to have a clear understanding of what we're asking, to enjoy cooperating, and to be able to pay attention even around distractions. This course distills down the critical elements of communication, training skills, building confidence, and preparing for successful visits to the crag together.

Your dog might breeze through some elements of this course with ease! And they might need more help and time with others.

Take the course at your own pace, and your dog's pace. Training should be sustainable - there's no need to try to train for an hour a day only to burn out within a few weeks.

Ideally, try for 5 minutes of training a day. Really, that's it. If you can break that up into two sessions each day, even better! Dogs learn best in short, fun sessions.

This course is a 6 week program - but that doesn't mean your dog's training needs will fit that same timeline! Start at Level 1 for each skill, and progress as your dog (and you) feel great about working at that level. We're building a solid foundation with a lot of practice ahead of time to build good habits, so when we're at the actual crag together, your pup knows what to do inside, outside, and backward.

If you or your dog need extra help, please reach out! We can work together to troubleshoot training questions or meet for online training together. This can be especially helpful for behavior modification training that your pup might need a specific plan to help conquer.
